

Seismic Public Meeting Notice

To the Citizens and Landowners of Allen, Avoyelles, Evangeline, Pointe Coupee, Rapides, and St. Landry Parishes, Louisiana:

CGG, Fairfield Geotechnologies, and SAExploration will be conducting a 3D seismic survey, which is permitted through LDWF and the USACE, to include portions of Allen, Avoyelles, Evangeline, Pointe Coupee, Rapides, and St. Landry Parishes, LA. The project area encompasses 1,766 square miles and the major towns of Bunkie, Glenmora, Lecompse, Marksville, Simmesport, and Ville Platte, Louisiana as well as the unincorporated areas between the towns. Major roads within and near the project area include US 165, US 167, US 71, Interstate 49, and Louisiana 1. The purpose of this survey is to provide a high-resolution image of the subsurface geological features that will allow the client to effectively evaluate the hydrocarbon reserves underlying the project area. The survey requires the deployment of motion sensing devices (geophones or receivers), which would be deployed at regular intervals (220 feet), with spacing between receiver lines of 1,100 feet. The survey design would also incorporate an energy source, which would be placed at regular intervals in a grid pattern.

There will be a public meeting located at Bunkie City Hall Annex Building starting at 6:00 P.M. on October 29, 2018 to answer any questions pertaining to this seismic survey.

Meeting Location: Bunkie City Hall Annex, 107 W Oak St, Bunkie, LA 71322

The survey will begin November 1, 2018 and last until November 2019.

For additional details pertaining to the seismic survey prior to the public meeting date contact Jackie Gilliam at (281) 252-9799.

An outline of the seismic project showing the potential area to be affected is located at <http://www.wlf.louisiana.gov/fishing/seismic-exploration-activity-program> under the public meeting tab located at the top of the page.
